LOUDSPEAKER

DP15-MKIII

One of the first few products from IVA, the DP series is a beast by nature. It is exceptionally powerful yet delivers crystal clear sound to the audience. The multi-plywood cabinet is designed for robustness and ruggedness and is able to withstand rough use. The DP series has a unique HF horn flare design that allows for 2 different dispersion angles for near and far field simultaneously. This ensures the high frequencies are evenly distributed across the distance. For the discerning users, the core strength of the DP series lies in the drivers installed within. These drivers are carefully selected from Eminence (USA) and Fane (UK), and meticulously matched with our custom crossover circuits. A fine example of integrating proven western technology into the Malaysian designed DP series speakers.

IVA

DP-15mkIII Full Range Loudspeaker

FEATURES

- American Standard Series Driver
- 600W American Rhythm and Beat

SPECIFICATIONS

System Type	2-way 15" full range
Frequency Response	38Hz ~ 20KHz
Dispersion	100° × 50 (H × V)
Handling Power	600W(RMS) / 2400W(PEAK)
Sensitivity	102dB @ 1w/1m
Maximum SPL	124.5dB
Impedance	8 ohms
Suspension	12 × M10 Flypoint
Dimensions (W × D × H)	465 × 388 × 710mm (Rear Width 135m)
Weight	29kg
