

Professional Shotgun Microphone

IVA 200

Video Shotgun Recording Microphone

The IVA 200 electric condenser shotgun microphone is designed to cater for professional as well as amateur video enthusiasts. This microphone features three-stage switch setting (Off-Normal-Tele) to provide sharper pickup and reduced sensitivity to ambient sound when it is used for long distant miking. Its cardioid's polar pattern offers a wide frequency response, clear pick up of the targeted sound and added warmth when it is used for close-up miking.

Specifications:

- Elements : Electric Condenser
- Polar Pattern : Hypercardioid
- Frequency : 40 ~ 16,5, 000 Hz
- Sensitivity : -56dB \pm 3dB (0dB = 1 μ bar @ 1KHz)
- Impedance : 2,200 Ω \pm 30% (@1KHz)
- Operating Voltage : 9V ~ 52V DC Phantom Power
- Connector : Mini-XLR (male)
- Dimensions : 20 x 200 mm

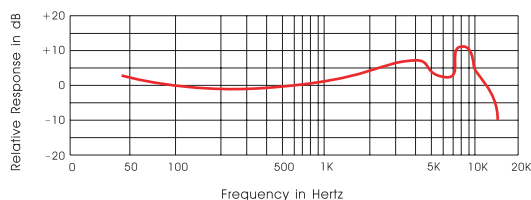

Features:

- Compact shotgun microphone
- Hypercardioid polar pattern
- Short shotgun is ideal for close-up video recording
- Long shotgun is ideal for long distance pick-up in location filming, TV production and spot news coverage
- Phantom powered with built-in power module

Applications:

- Recording
- TV, motion pictures, video production
