

IVA 900 Broadcasting Headphone

The IVA 900 is a closed type stereo dynamic headphone designed for DJ's, broadcasters, musicians and music lovers as well as any applications where no sound must leak from the headphone. It is highly appreciated by recording studios, live sound, TV sound, and broadcast engineers. IVA 900 utilizes a 57-milimeter dynamic driver and neodymium magnet for superior sound reproduction. Its soft & extremely comfortable ear pads offers long hours of completely natural listening experience while its soft-padded head band can be adjusted to fit any head size for easy-wearing listening. An ultra-flexible coiled cable at the left earpiece terminates to a mini plug (diameter 3.5mm) (a 6.3mm adaptor is included)
